

Run Order

Print | Order of Run | Run Order

The **Order of Run - Run Order** printing option sends the riders and horses to the printer in the Draw order -- first Rider & Horse in the Draw are first on the list. When you select this menu choice, you are prompted for several options:

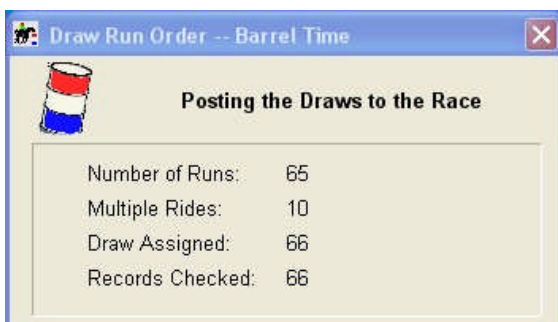

First you are asked if you want the names printed in a Lastname, Firstname format. The default is [No], which will print in a Firstname Lastname format.

Then you are asked to select whether you want the report to "print to" the computer screen or to the printer. The printer is the default.

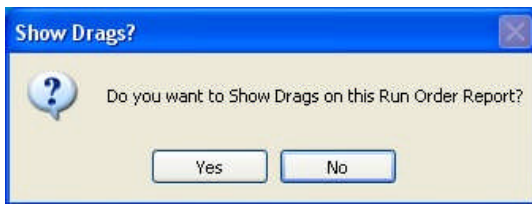

If the Run Order has not been set, you are asked if you want to Randomize the Run Order before printing. (If the Run Order had been set previous to this report, this prompt is skipped.) If you say, [Yes]

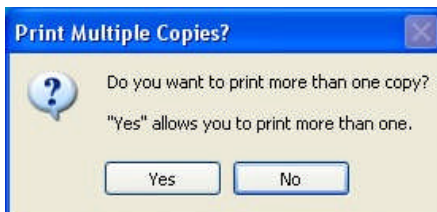

The system sets the Run (Draw) Order...

and lets you know when it's done.

Then it asks if you want to show the Drags on the report.

If the report is going to the Printer, it asks how many copies you need.

Report Previewer - Barrel Time
